EDUCATION

2021-2024
LYCÉE TECHNIQUE D'AMITIE SINO-BENINOISE D'AKASSATO
Baccalaureat

2024-2026
UNSTIM-INSTI
Electrical and Computer Engineering

OTHER SKILL

Game Development:
Logic & Algorithm design, Collision physics, AI behaviors, UI/UX implementation.

Tools:
Godot Engine, C++, GDScript.

LANGUAGES

Native French speaker
Intermediate proficiency in English

HOBBIES

- Exploring new technologies or software
- Programming
- Basketball
- Video games

PROFILE

John AYIVI second year in student in electrical and computer engineering. Passionate about innovative technologies and digital solutions. After obtaining his high school diploma in electronics, He choose to continue his studies in engineering to develop his skills in electronics and computer science. Known for his determination, he aims to use his knowledge to tackle the technological challenges of tomorrow.

WORK EXPERIENCE

Accompli Technologie et Service — September 2025

- Performed maintenance and troubleshooting on various electronic components and circuits
- Provided hardware and software technical support, including OS installation and system recovery.
- Assisted in network infrastructure setup, cabling, and basic router/switch configuration

Prototype Validation — Juin 2025

- Conducted performance testing and validation of prototypes for electrotechnical systems

LEADERSHIP EXPERIENCE

Class leader — 2020 - 2021

Middle School [DAV-AMEN]

- **Liaison:** Acted as the official spokesperson for the students in meetings with teachers and school administration.
- **Mediation:** Facilitated conflict resolution among pears to ensure a productive and harmonious classroom environment.
- **Organization:** Coordinated group study sessions and managed the planning of class-led extracurricular projects.

COMMUNITY WORK

Digital training for young people:

Organize workshops or training sessions on computer science for young people in your community, especially those who lack access to technological resources. This could include learning basic computer skills, programming, or even electrotechnics.
